LeanSigma[®] Fundamentals for Healthcare

LeanSigma Fundamentals for Healthcare is a two-day introductory workshop for executive and operational leaders from healthcare providers, payers and related industries. It's designed to help participants understand how to leverage the power of LeanSigma within their own organizations to deliver unprecedented performance.

Guidon's LeanSigma Fundamentals workshop is an ideal starting point for organizations in the healthcare industry interested in learning how to apply our unique fusion of Lean and Six Sigma methodologies to improve patient safety, increase efficiency and streamline process flow.

About Guidon

Guidon Performance Solutions pioneered the fusion of Lean and Six Sigma in the healthcare and service sector to help organizations reduce waste, streamline processes, enhance productivity and improve patient satisfaction.

"In a world where there are many who espouse quality improvement and techniques to get there, you guys REALLY get it."

Bob Porter, Executive Vice President,
Strategy & Business Development
SSM Health Care St. Louis

LeanSigma[®] Fundamentals for Healthcare

How You Will Benefit

At our two-day LeanSigma Fundamentals for Healthcare workshop you will learn a concise overview of how and why LeanSigma methodologies are so effective in every area of healthcare delivery.

See how you can leverage the power of LeanSigma to yield these typical results:

- Cut end-to-end cycle time from days or weeks to hours
- Accelerate patient throughput and flow by up to 50%
- Dramatically raise satisfaction levels among patients, staff and physicians
- Match capacity to volume, staff skill sets and productivity
- Increase efficiencies and save money in places often overlooked

What You Will Learn

- Essential principles of LeanSigma methodology
- The practical application of Lean principles and tools through a hands-on simulation showing how teamwork and speed drive dramatic improvement
- How to identify and eliminate the non-value-adding activities that often take up as much as 90% of a typical process
- How to get your transformation started using LeanSigma processes
- How to maintain momentum and rally your entire organization around your process improvement objectives

Who Should Attend

- Healthcare providers including C-level executives, administrators and managers
- Health quality and performance improvement professionals
- Healthcare payers including C-level executives and senior and middle management
- Federal, state and local agencies linked to the healthcare system
- Policy-making staff, healthcare executive and allied health professionals

Guidon's Promise

Guidon unconditionally guarantees your absolute satisfaction. If for any reason you are not satisfied with a Guidon workshop, we will refund 100% of your attendance fee.

Terms and Conditions

You will be invoiced for the workshop fees which are due in full prior to the start of the workshop. Fees include workshop materials, lunch and refreshments.

Cancellation Policy

Cancellations must be received in writing. Cancellations received within six to ten business days of the event will be subject to a 50% cancellation fee. Cancellations received within five business days of the event will be subject to a 100% cancellation fee. Guidon reserves the right to cancel any event where sufficient registration levels have not been met.

WORKSHOP AGENDA

DAY
1

Introduction and Expectations

Time-based Strategy
Reduce patient cycle-time and simultaneously improve service, cost and quality

LeanSigma[®] Execution
Principles and Methodology

Simulation
Experience the Current State

The Patient and Specifying Value
Express value from the patient's perspective and in terms of a specific service

Identifying the Value Stream
Mapping the value-added and non-value added steps involved in bringing a service to the patient

Establishing Flow
The continuous improvement of service and information throughout the entire process

Pull from the Patient
The process flow activated by patient demand that signals the need for a service

DAY
2

Continuation

Simulation
Apply and Develop the Future State

Simulation
Experience the Improvement

Continuously Improve, Eliminate Root Cause and Sustain Impact
Completely eliminate waste so that all tasks create value for the patient

Cultural Transformation
Creating the desired culture

Wrap-up
